Subject: Opportunity for Ph.D. candidates at UW-Platteville TREES Lab

Dear Colleagues,

I am happy to announce an excellent opportunity for interested Ph.D. candidates who will have ABD status by the Fall of 2013. The University of Wisconsin - Platteville is advertising five fellowship positions to Ph.D. candidates of exceptional promise with the express interest of increasing diversity, in the broadest sense of the term, among faculty. The fellowships will pay \$36,000 for one year, renewable up to three years, and come with excellent benefits. The successful applicants can reside in any of a number of programs on campus, including Geography, Geology, Biology, and Anthropology.

I am curious if anyone on the Forum who is qualified for this position is interested in teaching, conducting research, and mentoring students at an undergraduate institution, particularly through the Tree-Ring, Earth, and Environmental Sciences Laboratory (TREES Lab): <http://www3.uwplatt.edu/trees>

The full position description is available here:

<http://www.uwplatt.edu/pers/employ/Fac-UFP.htm>

If you are interested in learning more about this opportunity please contact me directly at :
